Number of Referrals Made by Type (FY22 Q1-Q4)

Races of Clients Served

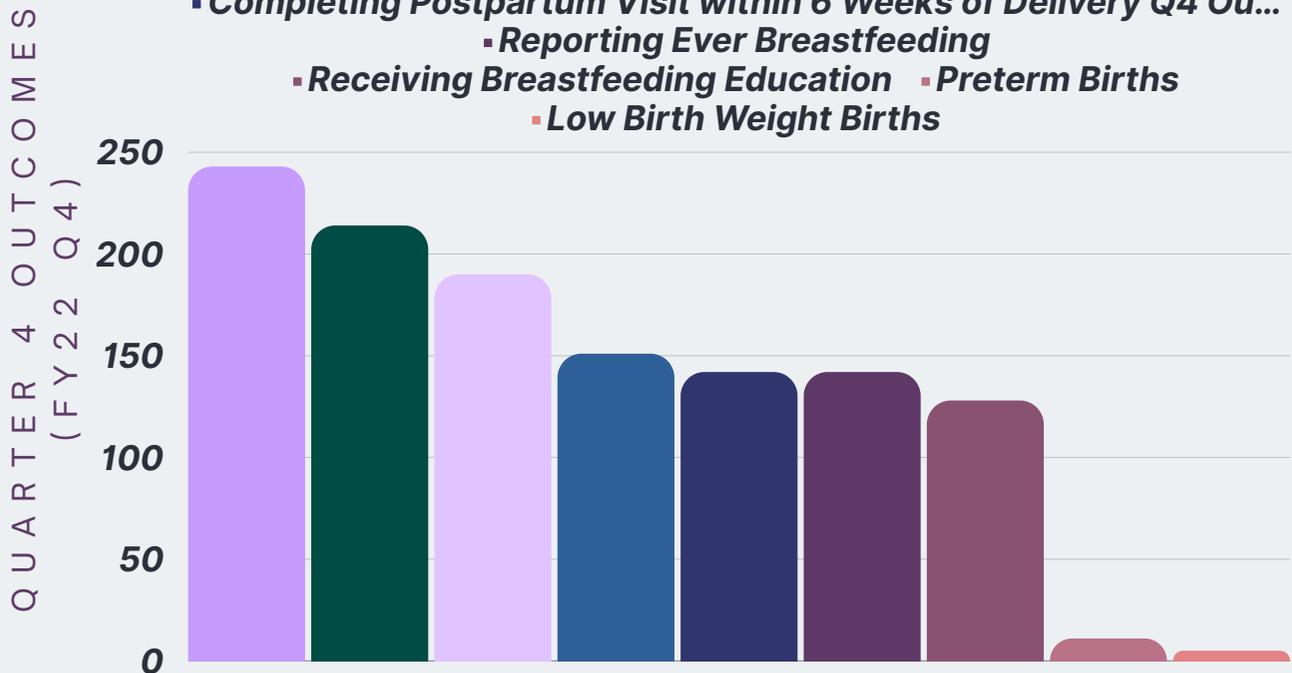

CHWs utilize NCCARE360 to send and receive referrals with local services and resources in the Charlotte-Metro region. NCCARE360 is the first statewide coordinated care network that better connects individuals to local services and resources, such as: food insecurity, housing instability, lack of transportation access, or other social needs. Learn more about NCCARE360 at nccare360.org

Overall Impact Review

AGJ 2022 Preterm Birth Rate vs. National Average

In this visual comparison, the bar chart illustrates A Guided Journey's (AGJ) 2022 preterm birth rate at 11%, outperforming the national average. The chart represents the national average with a 1% decline from 2021 as reported by the CDC. AGJ's higher preterm birth rate suggests that the program has successfully reduced health inequities, emphasizing the potential impact of Community Health Workers in enhancing maternal and child health outcomes.

Program Participant Outcomes (FY22 Q1-Q4)

An **Encounter** is defined as an interaction between a client and a CHW for the purposes of providing a referral and/or assessing the health status of a client.
